BOOKER ACADEMY

HighSchool diploma

PROJECTS

ACCESS AFYA ANALYTICS PLATFORM

With my expertise in Full stack software development I was assigned the task by Access Afya Limited to create an analytics platform that would contain and display patient data monitored over a period of time and efficiently manage clinics by optimizing on key metrics that are fundamental to operational efficiency all displayed on the application dashboard .I implemented the above analytics module in a sprint of two weeks .

URL: <https://accessafyaplatform.netlify.app/>

The will to disruptively create affordable primary care access that delivers on quality for every patient regardless of economic background all the time necessitated the creation of this piece of software built on Javascript ,Html ,Scss ,ReactJS for the product front end and GraphQL api for data query to specific back end data points also implementing services with netlify deployment.

NEWS APPLICATION

This is a personal project implemented in a sprint of three days.

URL: <https://lokeyfeellike.herokuapp.com/>

This is a python application ,the urge to create this software was inspired by the fact that a number of people miss out on occurring news from time to time due to various reasons .This application enables a user to catch up on both local and international news from every corner of the world. Built on Pthon,Html,Css, Bootstrap,Flask framework also implementing services with heroku deployment and the news api.
